

A JOURNEY THROUGH MY FANTASY WORLD.

WERE ALL IN THIS TOGETHER

Since the beginning of the year 2020, the coronavirus has had a firm grip on people worldwide and our lives have changed enormously. In cooperation with students from the University of Pécs, we, the students of the HfK+G in Stuttgart, dealt intensively with this topic. We students wrote personal diaries and documented our experiences with the pandemic. We noted, reflected and described the current situation. In mid-November in 2020, the online workshop with the students from Pécs took place. They also dealt with their thoughts, feelings and fears during this time. During the 5-day workshop, we deeply analyzed our diaries in groups and solved new tasks every day. The goal of the workshop was to go deeper into a group topic and visualize it with a communication concept. In my group members' diaries, the topic of loneliness came up again and again. We realized that

because of Corona, we all felt locked in and alone. So we created a fictional world in which we could be together. In this book I continue that world. I deal with my great passion, traveling, which I can't do at the moment because of Corona. Away from the terrible things that are happening in the world right now, I travel through the countries which have a special meaning for me. I remember times that brought a smile to my face and gave memories for eternity. I start with Australia, where I had my most amazing time of life for 4 months with my best friend. After that, I head back to Thailand where I had my first longer vacation with my boyfriend and got to experience a new culture. And then I'm in Africa, where I was able to see the world's largest wild animals very close. My inner journey ends with the city of St. Tropez, because it offers such a special charm with which I wanted to end my book.
